SUMMARY

Full-stack developer specializing in Angular, Node.js, and Django, building high-performance web applications for e-commerce, learning management, legal, and live-data systems. Experienced in localization and Arabic/RTL interfaces, payment integration, real-time features, and performance optimization. Collaborates with remote teams to ship on tight deadlines without compromising scalability. Portfolio: [soking.digital](#).

SKILLS

Front-End: Angular, TypeScript, JavaScript, HTML, CSS/SCSS, Tailwind CSS, Localization (i18n), RTL/Arabic UI

Back-End: Node.js, Express, Django, Python, RESTful APIs, Socket.IO, JWT Authentication, C#, Lua

Databases: MongoDB, PostgreSQL, Redis

DevOps & Tools: Docker, Cloudflare, Linux VPS, Git, Lemon Squeezy (payments), Rate Limiting

EXPERIENCE

Full-Stack Developer | The POST | Remote | 2025 – Present

- Build internal tools, analytics dashboards, and customer-facing portals using Angular, Node.js, MongoDB, and TypeScript.
- Developed UFeed, an HR evaluation platform that turns employee review cycles into actionable dashboards (Angular, Django, PostgreSQL).
- Ship features in weekly increments as part of a small remote product team.

Freelance Full-Stack Developer | Upwork, Fiverr, Khamsat | Remote | 2024 – 2025

- Designed and delivered web and desktop applications for clients across several countries and industries using Django, the MEAN stack, C#, and Lua.
- Scoped projects with clients, clarified requirements early, and delivered on agreed deadlines.

PROJECTS

EG-Pricey | [eg-pricey.com](#) | 2025

Angular, Node.js, Express, MongoDB, Socket.IO

- Built an Egyptian price-tracking platform with real-time updates on currencies, gold, fuel, and food prices; Arabic-first with full RTL support.
- Pushed live prices over WebSockets instead of polling, keeping long-open sessions accurate while reducing API load.
- Added a financial tools section with interactive loan, investment, and savings calculators.

XTranslator (SaaS) | [xtranslator.app](#) | 2024

Angular, Node.js, Lemon Squeezy, Cloudflare

- Implemented localization supporting multiple languages and regions for a subscription translation platform.
- Integrated Lemon Squeezy as merchant of record for secure, globally compliant subscription billing.
- Implemented rate limiting and bot filtering to protect the application from abuse and maintain performance under load.

TileGreen | [tilegreen.org](#) | 2024

Angular, SCSS

- Developed the bilingual (English/Arabic) website for an Egyptian climate-tech startup that converts non-recyclable plastic into 40+ carbon-negative building products.
- Built English and Arabic from one shared layout system so both directions stay consistent.

Faculty of Nursing, Damanhour University | [nursing.dmu.edu.eg](#) | 2025

Angular

- Contributed to the official bilingual faculty website presenting its academic identity and institutional accreditation, optimized for older devices and slow connections.

Contact Management API

Node.js, Express, MongoDB, Socket.IO, JWT

- Built a RESTful contacts API with JWT authentication, bcrypt password hashing, and Socket.IO real-time notifications; added record locking to prevent concurrent edits, validation rules, and pagination.

EDUCATION

Bachelor of Computer Science | Cairo Higher Institute | Cairo, Egypt | 2020 – 2025

TRAINING

Full-Stack Web Development (MEAN Stack) | National Telecommunication Institute (NTI) | Cairo | 2023

Full-Stack Summer Training | Cairo Higher Institute | Cairo
